THE SCHOOL WAS ONCE A CON EDISON SITE-SOIL SAMPLES RECENTLY TAKEN SHOW SOIL CONTAMINATION.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL" e2mis no. 143651:

Yelena Skorobogatov #84153, EH&S Remediation, reported to W. Lee #33243, Manhattan Environmental Desk, at 16:13 hours that she discovered approx. 1 gallon of unknown oil in each of two soil borings located at the Benjamin High School site on East 16 Street and the FDR Drive. The soil borings were being performed

by Clayton Environmental Contractor for EH&S. One soil boring was done in the schoolyard and the other one in the basement of the school cafeteria. She discovered approx. 1 gallon of unknown oil in each boring for a total of two gallons of unknown oil. The unknown oil was found in the soil mixed with ground water. The source and cause of the spill is unknown. According to Yelena Skorobogatov this is an historic spill site.

Ground water and soil / solid samples were taken by the Contractor for VOC, SVOC, Metals and Identification. No initial cleanup action was taken. Cleanup is pending further investigation and testing. Y. Skorobogatv reported that P.I.D. readings for TVOC were 88 ppm in the schoolyard and 1,000 ppm in the basement of the cafeteria.
