

Morse Chain Division — INTER-OFFICE CORRESPONDENCE

R. C. Curran

DATE August 18, 1972

Bill Tompkins

REF.

In reference to Kent Dolby's memorandums of 7/28/72 and 8/4/72 regarding trichlorethylene and effluent waters, these memos should all be Personal and Confidential and should only be issued to the three of us and Dolby.

Both of these letters refer to critical areas where priority action is required. I think that the three of us should physically review these items and then it is very important, Bill, that you get into them and make some recommendations as quickly as possible.

R. C. Curran
